

Garvika Enterprise Loan Portal - Detailed Project Documentation

1. Project Vision

Build a professional PHP + MySQL loan portal where customers can apply online for Home Loan, Personal Loan, Business Loan, Loan Against Property (LAP), and Balance Transfer. The system includes customer forms, dynamic document uploads, an admin dashboard, lead management, and reporting.

2. User Roles

Administrator: manages leads, reviews documents, updates loan status, maintains bank partners.
Customer: submits applications, uploads documents, checks application status.

3. Portal Pages

Home, About, Services, Bank Partners, EMI Calculator, Apply Loan, Contact, Customer Login, Admin Login, Dashboard, Lead Details, Reports, Settings.

4. Loan Products

Home Loan, Personal Loan, Business Loan, Loan Against Property (LAP), Balance Transfer, Finance Services.

5. Document Requirements

Dynamic requirements based on loan type and employment:
Aadhaar Card, PAN Card, ITR, Form 16, Salary Slip, Bank Statements, Property Papers, GST Registration, Business Proof.

6. Database Design

Suggested tables: admins, customers, loan_applications, documents, banks, bank_partners, lead_logs, notifications, settings.

7. Admin Dashboard

Widgets for Total Leads, Pending, Approved, Rejected, Today's Leads, Search, Filters, Notes, Document Viewer, Export Reports.

8. Security

Password hashing, input validation, session management, CSRF protection, HTTPS, secure file uploads, role-based access.

9. Deployment

Deploy on PHP hosting with MySQL. Import database.sql, update config/database.php, upload files through cPanel File Manager or Git deployment, configure SSL and domain.
